

The North American Deep Drawing Research Group (NADDRG) is a professional organization composed of engineers and scientists from academia and industry designed to foster, encourage, and disseminate research findings in the field of sheet metal forming in association with the IDDRG (International Deep Drawing Research Group). NADDRG typically hosts two technical symposia per year. In contrast to many related symposia, those of NADDRG often consist of informal, off-the-record, in-progress presentations. More information about NADDRG can be found at <http://www.naddrg.org>

Location The Inn at St. John's Conference Center
44045 Five Mile Road, Plymouth, MI 48170
<http://www.stjohnsgolfconference.com/>

Date & Time November 16, 2017, 7:45 AM ~ 5 PM

Registration In order to register, please go to www.NADDRG.org and select the Next Meeting tab to Register and Pay for the upcoming meeting. The new registration fee was determined by NADDRG Executive Committee. All major credit cards are accepted. Even if you prefer to pay at the door, please register and do this as soon as possible, since this helps the organizers to get an accurate count for breakfast, lunch and refreshments.

Call for Presentation If you intend to present a paper on a relevant topic, please send the presentation title, presenter's name, and time requested for the presentation to the organizer as soon as possible, but no later than two weeks before the meeting. Presentations are requested to be restricted to 25 minutes, including setup, introduction of the speaker, and Q&A. However, presenters are permitted to request more or less than this time, subject to approval by the program chair. There is time to accommodate only 16 25-minute presentations, so please submit your presentation request as soon as possible to increase its chance of inclusion in the Program. Priority in selection of presentations will be given to members to meet their membership requirements.
